## **Integrated Sensors Inc. of Utica awarded AFRL contract** *by Fran Crumb, Information Directorate*

ROME, N.Y. — The Air Force Research Laboratory (AFRL) Information Directorate has awarded an \$847,000 contract to Integrated Sensors Inc. of Utica for technology to improve data fusion for military exercises.

The two-year contract will provide ground moving target indicator support for the Coalition Aerial Surveillance and Reconnaissance Advanced Concept Technology Demonstration (ACTD), as well as other fusion exercises.

“Integrated Sensors engineers will install, maintain and update sensor simulators at the AFRL Rome Research Site,” said

2nd Lt. Nathan E. Nysether, program manager in the directorate’s Information and Intelligence Exploitation Division.

“Company representatives will set up the simulators and then train our personnel,” said Nysether. “AFRL engineers will test the technology at various exercises and propose improvements that Integrated Sensors will then implement through additional software updates.”

ACTDs exploit mature and maturing technologies to solve important military problems and to rapidly transition new capabilities from the developer to the user. @
